**Local Development Plan 2032
Draft Plan Strategy**

Dear Local Development Plan Team,

I am writing regarding the Local Development Plan 2032 on the Draft Plan Strategy and wish to submit a comment regarding:

The supply of land and its allocation to meet demand for housing
To recognise there is a requirement to go beyond existing land zoning
to include in the Local Development Plan new land zoning opportunities

I would like to bring where we live to your attention as the land surrounding our land and property is being developed by new dwellings and housing developments.

1. There is a settlement boundary facing the front of our property
2. There is land zoned for housing that runs parallel with the back of our property
3. Building has commenced on the land zoned for housing that runs parallel to our land at the back of our property
4. Planning permission has been granted for three more new dwellings in the settlement opposite the front of our property

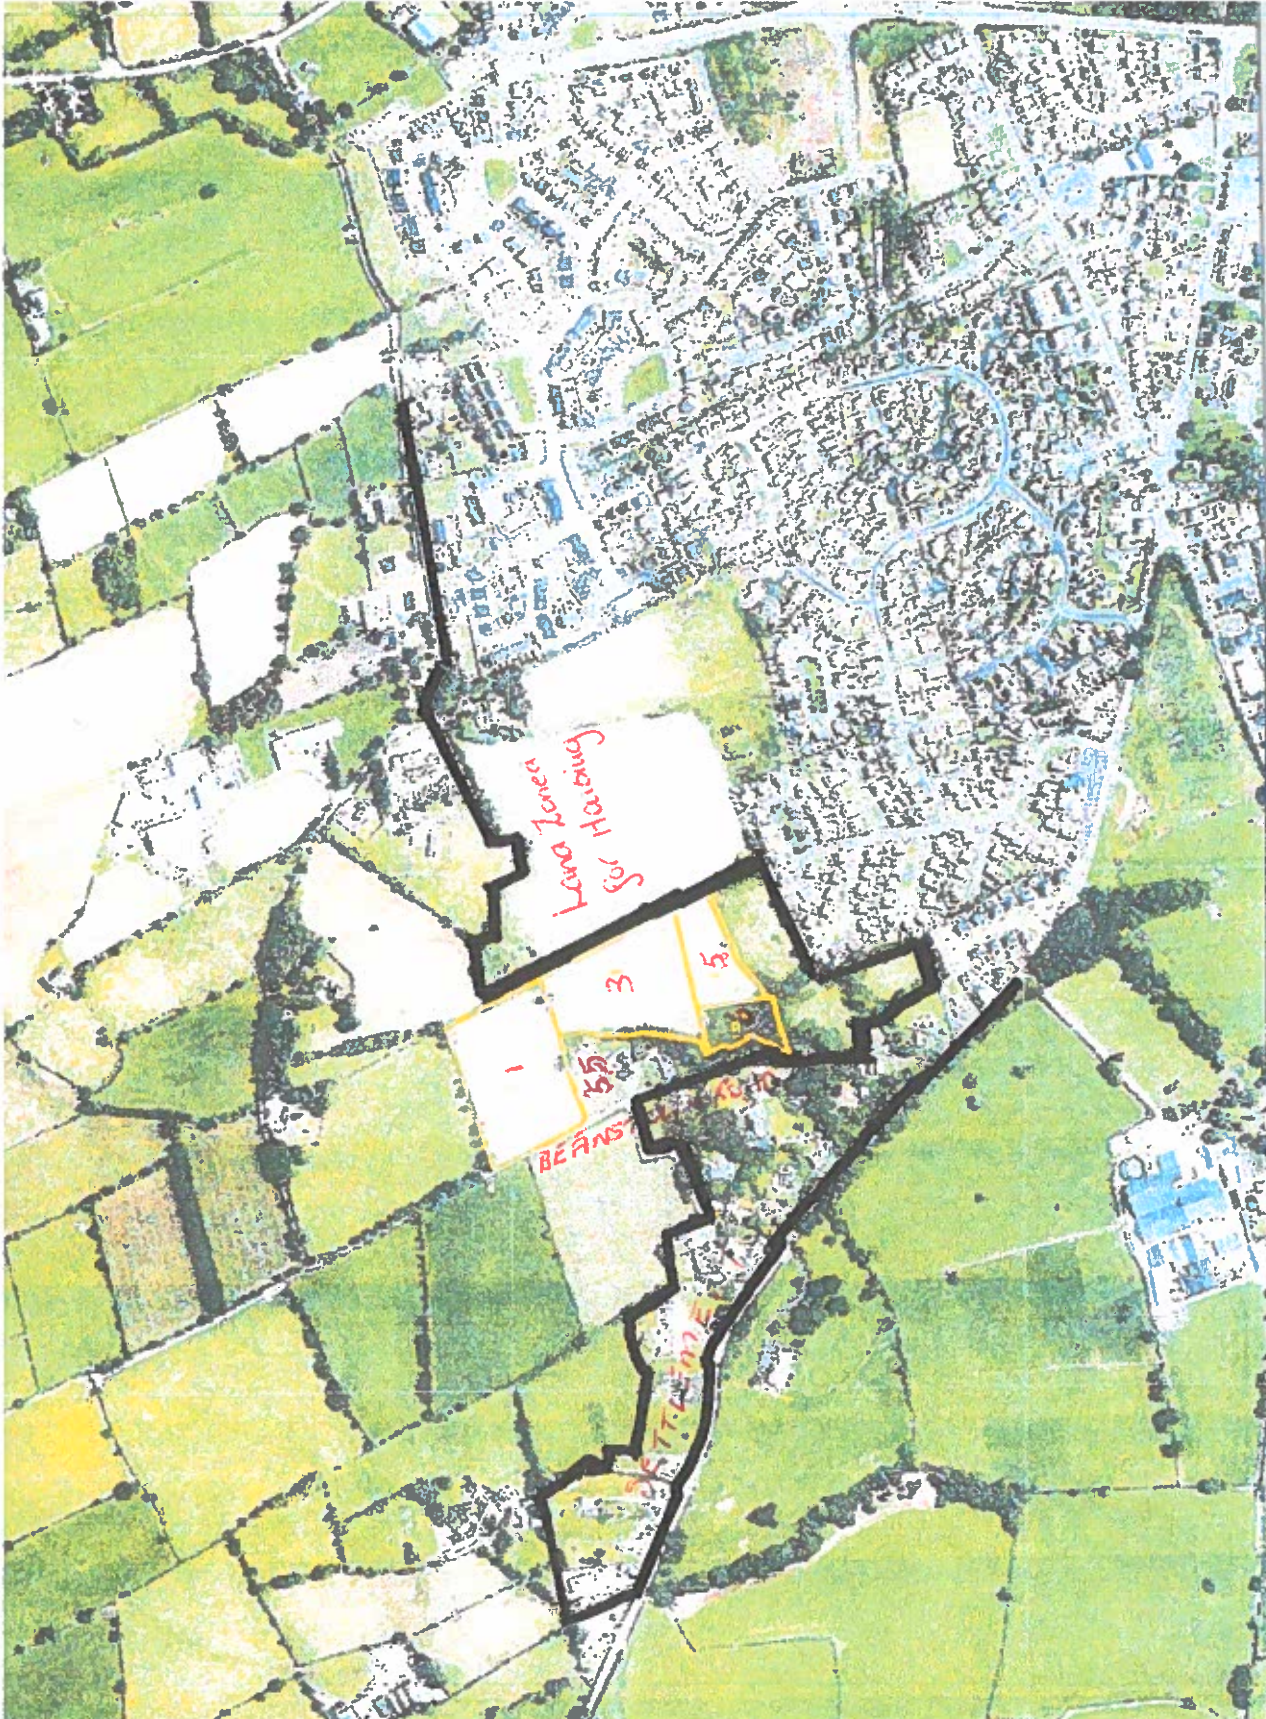

As you will see from the enclosed map our land of approximately 3.5 hectares is situated in the middle between the settlement boundary on one side and the land zoned for housing on the other side.

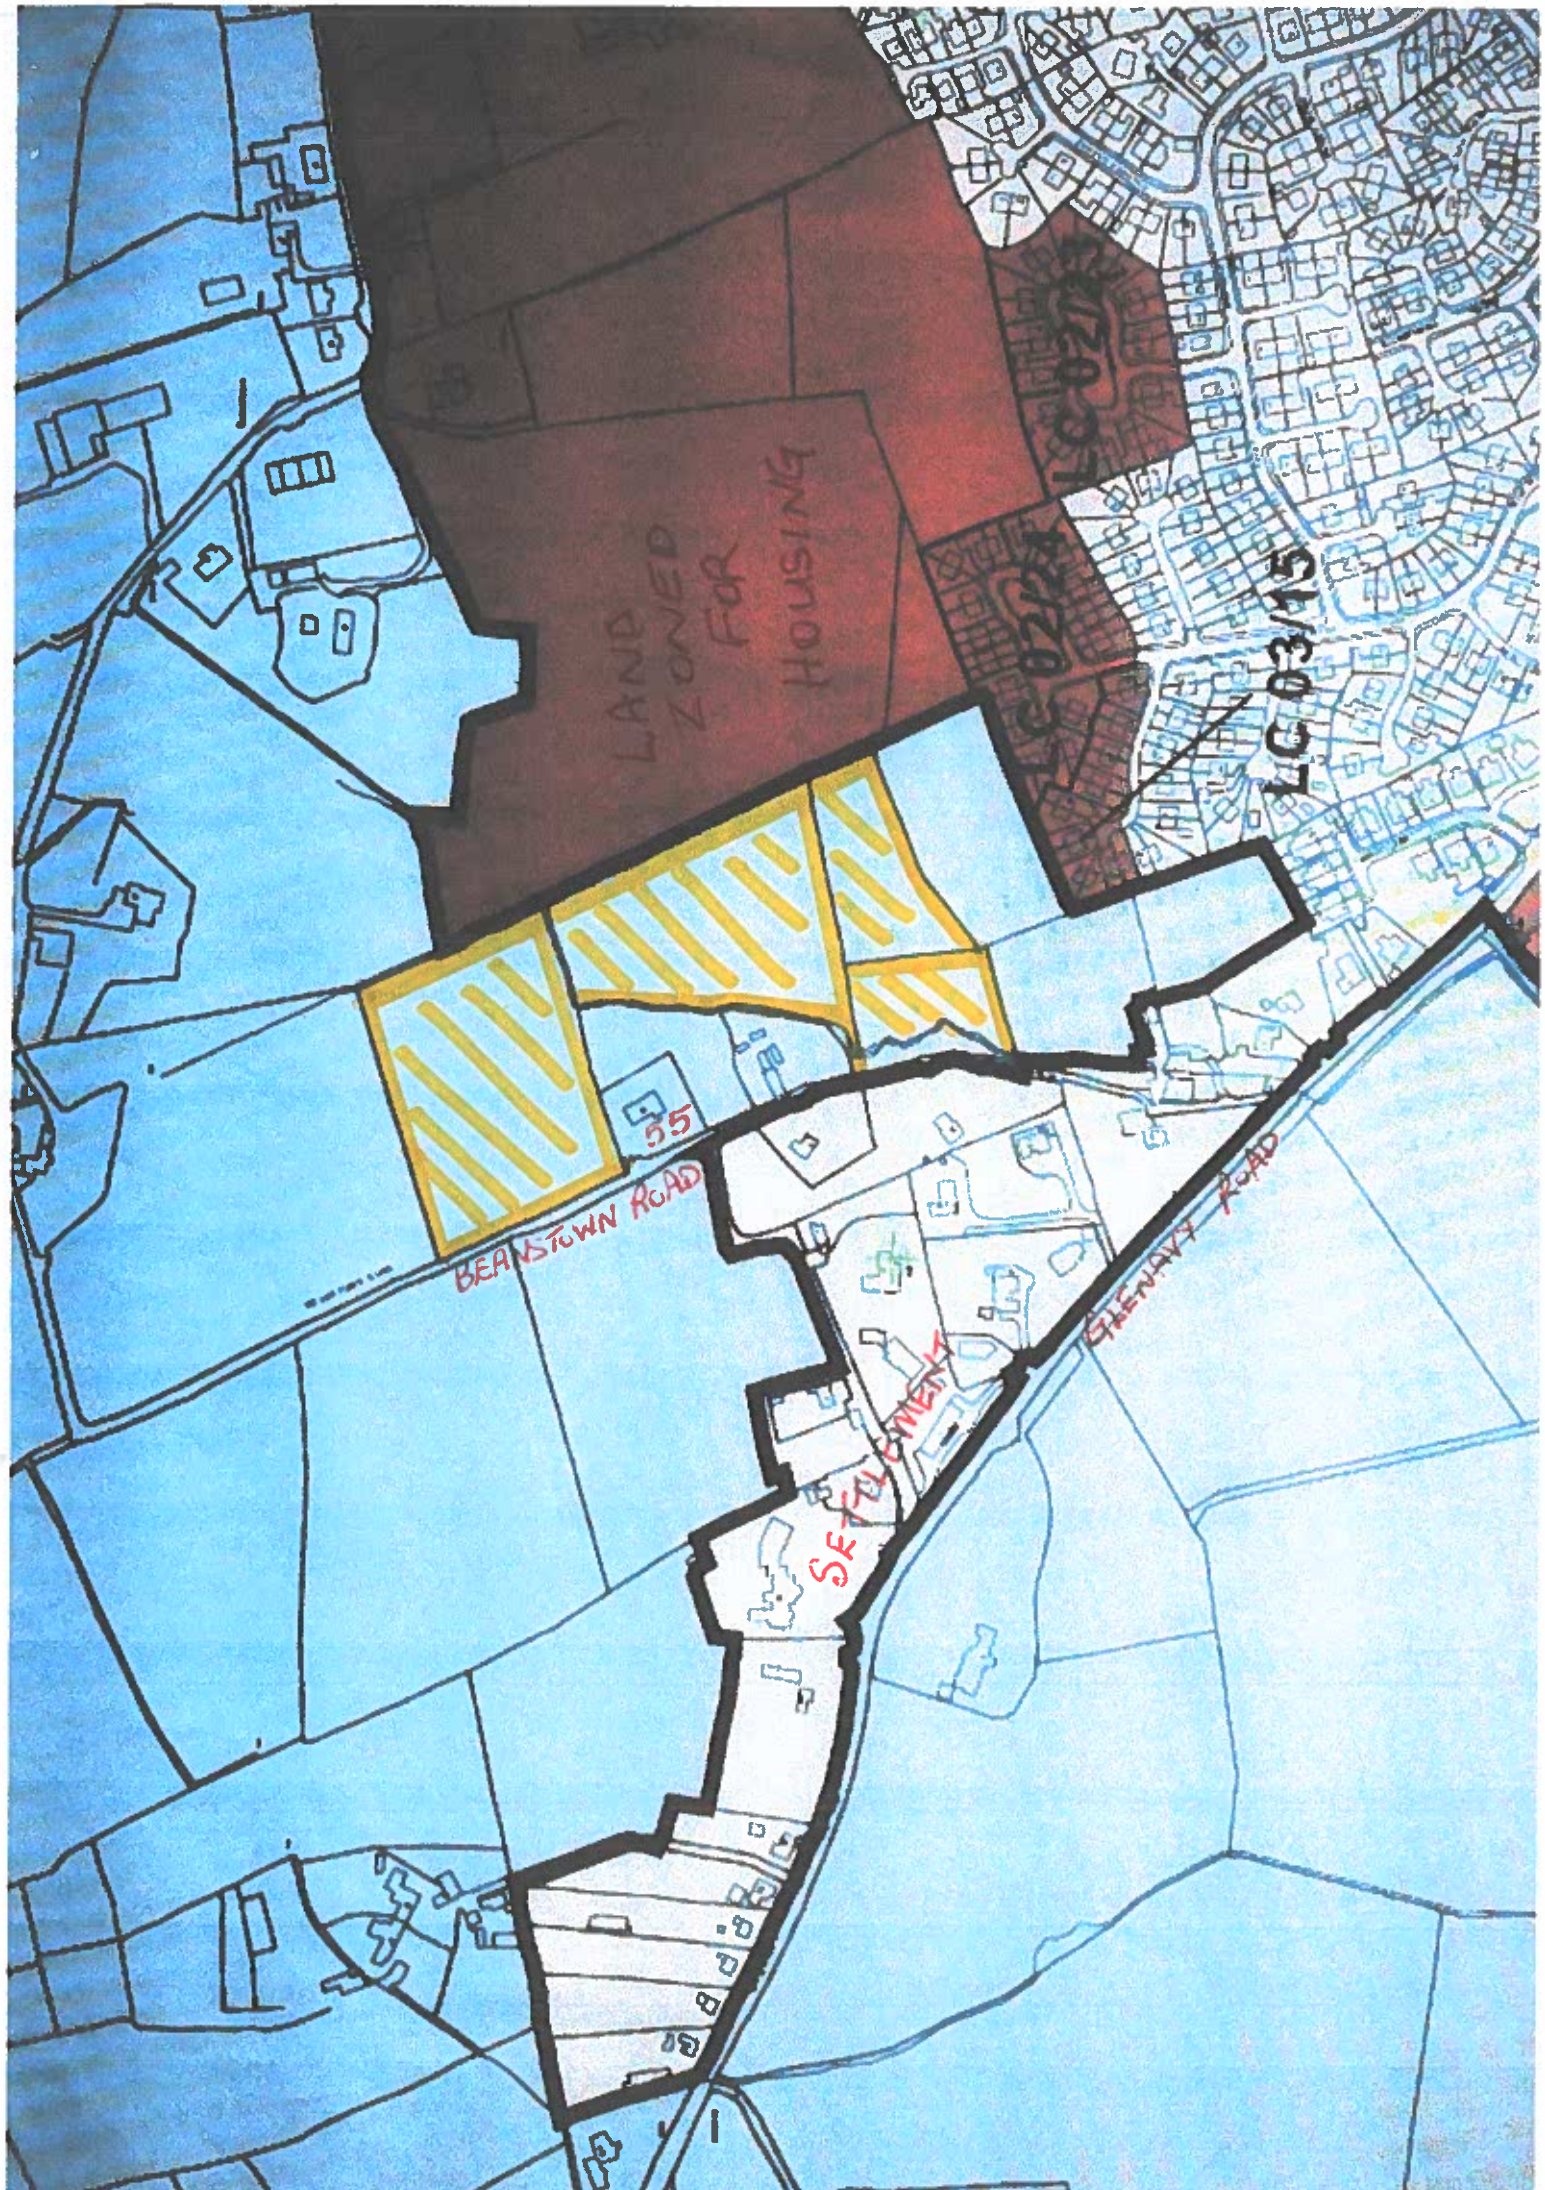

I would suggest that our land is in a prime position to facilitate future housing growth and would request that you would consider this land to be included and zoned for housing/development in the Local Development Plan.

I trust you will give our request careful thought and consideration.

Yours sincerely,

LAND
ZONED
FOR
HOUSING
